About the Siemens Technik Akademie Berlin

The Siemens Technik Akademie Berlin (STA) is an internationally orientated educational institution. We offer a Dual Bachelor of Engineering incl. a degree as an Associate Engineer in just four years. The first two years are taught in English. You will gain work experience throughout your education. The daily learning environment is reflected in many projects that involve students working independently within open learning situations. Our teaching concept is based on "System Approach" leading to students gaining "Handlungskompetenz".

Typical Career Path:

Open House Day

Welcome!

This will be the 19th time that the Siemens Technik Akademie Berlin has the chance to open its doors and to welcome you.

Numerous opportunities to experience the wonder of this unique institution are available to you between 11:30 and 17:00 on November 4th 2016.

Please be so kind and register at the front gate on the day of the event (Nonnendammallee 104).

We are looking forward to seeing you!
